ROSTER ISSUE

1985-1986

NORTH CAROLINA *Medical Journal*

VOLUME 46, NUMBER 8

AUGUST, 1985

ALPHABETICAL MEMBERSHIP LISTING AND ROSTER BY COUNTIES
Officers, Committees, Commissions and Boards

Price \$35.00 (plus 4½% N.C. Sales Tax). Extra copies may be obtained from North Carolina Medical Society, Box 27167, 222 N. Person St., Raleigh, N.C. 27611. Telephone 919/833-3836.

THE USE OF THIS ROSTER AS A MAILING LIST IS PROHIBITED EXCEPT BY SPECIFIC AUTHORITY.

WHO KNOWS A PHYSICIAN'S PROFESSIONAL LIABILITY NEEDS BETTER?

Another physician, of course. That is why Medical Mutual Insurance Company of North Carolina (MMIC), is a physician owned and directed company. Our Board of Directors consists of 18 physicians, all members of the North Carolina Medical Society. Currently MMIC insures approximately 80% of North Carolina's physicians and surgeons in private practice. We offer our insured physicians:

- limits of up to \$5,000,000
- active risk management program providing seminars throughout the state
- experienced judicious claims service
- participation in the company through a Board of Directors elected entirely by policyholders and guaranty capital holders

Distinctive properties on the ocean and the sound.

BEACON'S REACH

The Class of the Carolina Coast

Along two miles of ocean front and one mile of sound front, we offer several concepts within the award winning Beacon's Reach community. But all properties share the togetherness made possible by a well conceived master plan of beautiful landscaping, and outstanding recreational amenities.

Right from the beginning, coastal development by Don Brock and the Roosevelt Partnership has been different. Not only for the high praise and awards given by such as the Coastal Resources Commission, but also for the high standards of construction and recreational amenities recognized by almost everyone. Here at Beacon's Reach, outstanding creature comforts maintain peaceful harmony with natural surroundings.

Before you decide on coastal property anywhere, for vacations, retirement or investment, take a closer look at Beacon's Reach. We're on Bogue Banks, just across the bridge from Morehead City, in the town of Pine Knoll Shores.

Marina & Soundside homes from \$134,500.
Seaside homes & homesites from \$141,000.

Rentals in season - Weekly Only
Soundside - Oceanside
from \$450 from \$550

NORTH CAROLINA MEDICINE TODAY

Aging in its many aspects

It is estimated that 25 million people (11% of the population) are over age 65, and represent the fastest-growing segment of the population by far. It is further estimated that this group currently spends approximately 75 billion dollars annually for personal health care, and accounts for some 55% of all federal health dollars.¹ For these reasons alone, studies concerned with various aspects of aging are of vital importance to the entire nation. Much major research in this complex area is being conducted in North Carolina, at its several medical centers and universities, often under grants from the National Institute on Aging.

Studies cover a wide range

Recent studies have reported on the physiological dynamics of aging as related to circulatory diseases and circulatory risk factors at advanced ages (over 85) as compared to findings in a study population with a mean age of over 70 years.² Another study, stemming from the comprehensive Duke First Longitudinal Study, evaluated Wechsler Memory Scale scores as related to distance from death and the potential use of the WMS as a predictor of survival in both normal and demented elderly populations,³ while yet another compared young and old adults in the spontaneous use of context to learn and recall information.⁴

Dealing with America's fourth leading killer disease

Researchers at Duke University Center for the Study of Aging are focusing on the study of Alzheimer's disease, a type of primary neuronal degeneration that is the most common form of dementia. Estimates vary but indicate that as many as 4 million older Americans¹ are afflicted with this illness, which has been labeled "the disease of the century."⁵ Concurrent with its medical research on Alzheimer's disease, the Duke University Center is providing innovative support mechanisms for afflicted families and other caretakers. A hotline provides callers with telephone consultations, introductions to others close by in similar circumstances, and practical medical, legal and psychological information. The Center has also aided in the establishment of 19 local support groups statewide, and regularly makes available information on Alzheimer's disease to health providers, nursing homes and hospitals, and others responsible for programs and services directed toward the victims of this killer disease.⁶

TODAY: FOR THE PATIENT WITH MIXED DEPRESSION AND ANXIETY

- A rational approach, combining
- The standard antidepressant: amitriptyline
 - The proven anxiolytic action of Librium® (chlordiazepoxide HCl/Roche)®

Marked improvement often occurs as early as the first week

Headache, insomnia or GI upsets associated with mixed depression and anxiety often respond quickly

Feeling better, patients feel encouraged to stay the course—therefore, fewer dropouts: $P = .006$ compared to amitriptyline*

Convenient single *h.s.* dosing sufficient in some patients; helps patients with mixed depression and anxiety sleep through the night. Patients should be cautioned about the combined effects of Limbitrol with alcohol and other CNS depressants, and about activities requiring complete mental alertness such as operating machinery or driving a car.

In moderate depression and anxiety

IN PLACE OF
LIMBITROL 5-12.5 WRITE:

Limbitrol®

Each tablet contains 5 mg chlordiazepoxide and 12.5 mg amitriptyline (as the hydrochloride salt)

IN PLACE OF
LIMBITROL 10-25 WRITE:

Limbitrol DS®

Each tablet contains 10 mg chlordiazepoxide and 25 mg amitriptyline (as the hydrochloride salt)

Easier to remember... easier to prescribe

*Feighner JP, et al. *Psychopharmacology* 61:217-225, Mar 22, 1979.

Please see summary of product information on following page.

LIMBITROL® [®] Tranquilizer-Antidepressant

Before prescribing, please consult complete product information, a summary of which follows:

Indications: Relief of moderate to severe depression associated with moderate to severe anxiety

Contraindications: Known hypersensitivity to benzodiazepines or tricyclic antidepressants. Do not use with monoamine oxidase (MAO) inhibitors or within 14 days following discontinuation of MAO inhibitors since hyperpyretic crises, severe convulsions and deaths have occurred with concomitant use, then initiate cautiously, gradually increasing dosage until optimal response is achieved. Contraindicated during acute recovery phase following myocardial infarction.

Warnings: Use with great care in patients with history of urinary retention or angle-closure glaucoma. Severe constipation may occur in patients taking tricyclic antidepressants and anticholinergic-type drugs. Closely supervise cardiovascular patients (Arrhythmias, sinus tachycardia and prolongation of conduction time reported with use of tricyclic antidepressants, especially high doses. Myocardial infarction and stroke reported with use of this class of drugs.) Caution patients about possible combined effects with alcohol and other CNS depressants and against hazardous occupations requiring complete mental alertness (e.g., operating machinery, driving).

Usage in Pregnancy: Use of minor tranquilizers during the first trimester should almost always be avoided because of increased risk of congenital malformations as suggested in several studies. Consider possibility of pregnancy when instituting therapy; advise patients to discuss therapy if they intend to or do become pregnant.

Since physical and psychological dependence to chlordiazepoxide have been reported rarely, use caution in administering Limbitrol to addiction-prone individuals or those who might increase dosage, withdrawal symptoms following discontinuation of either component alone have been reported (nausea, headache and malaise for amitriptyline, symptoms [including convulsions] similar to those of barbiturate withdrawal for chlordiazepoxide).

Precautions: Use with caution in patients with a history of seizures, in hyperthyroid patients or those on thyroid medication, and in patients with impaired renal or hepatic function. Because of the possibility of suicide in depressed patients, do not permit easy access to large quantities in these patients. Periodic liver function tests and blood counts are recommended during prolonged treatment. Amitriptyline component may block action of guanethidine or similar antihypertensives. Concomitant use with other psychotropic drugs has not been evaluated; sedative effects may be additive. Discontinue several days before surgery. Limit concomitant administration of ECT to essential treatment. See Warnings for precautions about pregnancy. Limbitrol should not be taken during the nursing period. Not recommended in children under 12. In the elderly and debilitated, limit to smallest effective dosage to preclude ataxia, oversedation, confusion or anticholinergic effects.

Adverse Reactions: Most frequently reported are those associated with either component alone: drowsiness, dry mouth, constipation, blurred vision, dizziness and bloating. Less frequently occurring reactions include vivid dreams, impotence, tremor, confusion and nasal congestion. Many depressive symptoms including anorexia, fatigue, weakness, restlessness and lethargy have been reported as side effects of both Limbitrol and amitriptyline. Granulocytopenia, jaundice and hepatic dysfunction have been observed rarely.

The following list includes adverse reactions not reported with Limbitrol but requiring consideration because they have been reported with one or both components or closely related drugs.

Cardiovascular: Hypotension, hypertension, tachycardia, palpitations, myocardial infarction, arrhythmias, heart block, stroke.

Psychiatric: Euphoria, apprehension, poor concentration, delusions, hallucinations, hypomania and increased or decreased libido.

Neurologic: Incoordination, ataxia, numbness, tingling and paresthesias of the extremities, extrapyramidal symptoms, syncope, changes in EEG patterns.

Anticholinergic: Disturbance of accommodation, paralytic ileus, urinary retention, dilatation of urinary tract.

Allergic: Skin rash, urticaria, photosensitization, edema of face and tongue, pruritus.

Hematologic: Bone marrow depression including agranulocytosis, eosinophilia, purpura, thrombocytopenia.

Gastrointestinal: Nausea, epigastric distress, vomiting, anorexia, stomatitis, peculiar taste, diarrhea, black tongue.

Endocrine: Testicular swelling and gynecomastia in the male, breast enlargement, galactorrhea and minor menstrual irregularities in the female, elevation and lowering of blood sugar levels, and syndrome of inappropriate ADH (antidiuretic hormone) secretion.

Other: Headache, weight gain or loss, increased perspiration, urinary frequency, mydriasis, jaundice, alopecia, parotid swelling.

Overdosage: Immediately hospitalize patient suspected of having taken an overdose. Treatment is symptomatic and supportive. I.V. administration of 1 to 3 mg physostigmine salicylate has been reported to reverse the symptoms of amitriptyline poisoning. See complete product information for manifestation and treatment.

Dosage: Individualize according to symptom severity and patient response. Reduce to smallest effective dosage when satisfactory response is obtained. Larger portion of daily dose may be taken at bedtime. Single *h.s.* dose may suffice for some patients. Lower dosages are recommended for the elderly. Limbitrol DS (double strength) Tablets, initial dosage of three or four tablets daily in divided doses, increased up to six tablets or decreased to two tablets daily as required. Limbitrol Tablets, initial dosage of three or four tablets daily in divided doses, for patients who do not tolerate higher doses.

How Supplied: Double strength (DS) Tablets, white, film-coated, each containing 10 mg chlordiazepoxide and 25 mg amitriptyline (as the hydrochloride salt), and Tablets, white, film-coated, each containing 5 mg chlordiazepoxide and 12.5 mg amitriptyline (as the hydrochloride salt)—bottles of 100 and 500; Tel-E-Dose® packages of 100; Prescription Paks of 50.

At Pre-Construction Prices, Life at the Top Is No Less Grand, Just Far Less Expensive

For a Limited Time, a Homesite and Charter Membership at The Summit Are Just \$35,000.

You always said you'd earn a place at the top, and now your place is here. The Summit Golf & Country Club at Boone, North Carolina.

At The Summit you can own a homesite of up to one acre in the heart of the High Country, just two miles from the spectacular Blue Ridge Parkway. The scenery here is breathtaking, the access to sightseeing and recreation areas unsurpassed. Attractions like Ski Resorts, Blowing Rock, Grandfather Mountain and Tweetsie Railroad are all within a fifteen to thirty mile drive.

Life at the top is more than just a mountain setting. It's an eighteen-hole championship golf course with dozens of homesites overlooking the course. (Two and three bedroom villas and homedominiums also available.) It's a tennis club with indoor and outdoor courts. Racquetball. Equestrian center with stables, trails and show ring. Acres of ponds and trout lakes. Indoor and outdoor swimming pool. Nautilus center and health spa. A clubhouse with a gourmet restaurant and lounge. Twenty-four-hour security and much more. The price of your homesite includes a charter membership with full club privileges.

In short, The Summit is one of the High Country's premier residential resorts. Yet it's remarkably affordable. If you buy now, before construction begins, you can save thousands of dollars on homesites, villas and homedominiums. However, the special \$35,000 pre-construction price for homesites is for a limited time. So don't delay.

Now that you've earned a place at the top, let us show you the view. Visit our sales office in Boone. Call us toll free inside NC at 1-800-821-0354, outside NC 1-800-537-5335 or (704) 262-5344.

PHYSICIANS, A WEEKEND WITH THE RESERVE ISN'T JUST ANOTHER DAY AT THE OFFICE.

It's not just different in the Army Reserve, there are opportunities to explore other phases of medicine, to add knowledge, and to develop important administrative skills. There are enough different needs to fill right in your local Army Reserve unit to make a weekend a month exciting and rewarding.

Explore the possibilities. Call our officer counselor:

**Serving the MEDICAL PROFESSION of NORTH CAROLINA
and SOUTH CAROLINA since 1919.**

We equip many physicians beginning practice each year and invite your inquiries.

Our salesmen are located in all parts of North Carolina.

We have DISPLAYED at every N.C. State Medical Society Meeting since 1921
and advertised CONTINUOUSLY in the N.C. Journal since January 1940 issue.

IT'S NICE TO HAVE SOMEONE TO REALLY CARE FOR YOU.

When North Carolinians need medical attention, they need to know that someone is there. Someone who'll make certain all the finest care is given. And for just one monthly payment through an employer, that's exactly what our customers get.

The Personal Care Plan from Blue Cross and Blue Shield of North Carolina provides families with their own Personal Care Physician, who manages every aspect of their health care.

If you're a participating physician in the Personal Care Plan, you're working with us to offer the finest group health care available. High quality health care in a plan that's helping to hold back rising costs.

If you're not a participating physician, but would like to be, write or call Director, Professional Relations, Personal Care Plan, P.O. Box 2291, Durham, North Carolina 27702. Telephone 919 489-7431.

CARRY THE CARING CARD™

PERSONAL CARE PLAN

From Blue Cross and Blue Shield of North Carolina

WANTED

Board Certified physicians or finishing residents in the following specialties who desire an attractive alternative to civilian practice:

NEUROSURGERY
ORTHOPEDIC SURGERY

Positions are available at both Army teaching facilities and community hospitals throughout the Southeastern United States.

Every Army physician is a commissioned officer. The Army offers a rewarding practice without the burdens of malpractice insurance premiums and other non-medical distractions.

Army medicine provides a reasonable salary while stressing a good clinical practice. Some positions offer teaching appointments in an affiliated status with nearby civilian medical schools or teaching programs. The Army might be just the right prescription for you and your family.

To obtain more information on eligibility, salary, and fringe benefits write or call collect:

REMEMBER WHEN

Remember when someone was there to help?

You weren't feeling well and someone who loved you was there. To hold your hand. To give you comfort. To see to it that everything was going well. The people of Medical Personnel Pool®, North America's largest employer of nurses and other health care professionals, remember. In the home or in the hospital, we're dedicated to caring.

For a Registered Nurse, Therapist, Home Health

Aide, or Companion, we're ready to help. Most Medical Personnel Pool offices are Medicare certified, too. We have a free booklet for you which will answer many of your home health care questions. For a copy, please contact your local Medical Personnel Pool office listed in the white pages of your telephone book, or write us at the address below.

Because we remember what care is all about.

Consider the causative organisms...

Ceclor®

cefactor

250-mg Pulvules® t.i.d.

offers effectiveness against

the major causes of bacterial bronchitis

H. influenzae, *H. influenzae*, *S. pneumoniae*, *S. pyogenes*
(ampicillin-susceptible) (ampicillin-resistant)

Brief Summary Consult the package literature for prescribing information

Indications and Usage Ceclor® (cefactor, Lilly) is indicated in the treatment of the following infections when caused by susceptible strains of the designated microorganisms:

Lower respiratory infections, including pneumonia caused by *Streptococcus pneumoniae* (Diplococcus pneumoniae), *Haemophilus influenzae*, and *S. pyogenes* (group A beta-hemolytic streptococci).

Appropriate culture and susceptibility studies should be performed to determine susceptibility of the causative organism to Ceclor.

Contraindication: Ceclor is contraindicated in patients with known allergy to the cephalosporin group of antibiotics.

Warnings IN PENICILLIN-SENSITIVE PATIENTS, CEPHALOSPORIN ANTIBIOTICS SHOULD BE ADMINISTERED CAUTIOUSLY. THERE IS CLINICAL AND LABORATORY EVIDENCE OF PARTIAL CROSS-ALLERGENICITY OF THE PENICILLINS AND THE CEPHALOSPORINS, AND THERE ARE INSTANCES IN WHICH PATIENTS HAVE HAD REACTIONS, INCLUDING ANAPHYLAXIS, TO BOTH DRUG CLASSES.

Antibiotics, including Ceclor, should be administered cautiously to any patient who has demonstrated some form of allergy, particularly to drugs.

Pseudomembranous colitis has been reported with virtually all broad-spectrum antibiotics including macrolides, semisynthetic penicillins, and cephalosporins; therefore, it is important to consider its diagnosis in patients who develop diarrhea in association with the use of antibiotics. Such colitis may range in severity from mild to life-threatening.

Treatment with broad-spectrum antibiotics alters the normal flora of the colon and may permit overgrowth of clostridia. Studies indicate that a toxin produced by *Clostridium difficile* is one primary cause of antibiotic-associated colitis.

Mild cases of pseudomembranous colitis usually respond to drug discontinuance alone. In moderate to severe cases, manage-

ment should include sigmoidoscopy, appropriate bacteriologic studies, and fluid, electrolyte, and protein supplementation. When the colitis does not improve after the drug has been discontinued, or when it is severe, oral vancomycin is the drug of choice for antibiotic-associated pseudomembranous colitis produced by *C. difficile*. Other causes of colitis should be ruled out.

Precautions: General Precautions—If an allergic reaction to Ceclor (cefactor, Lilly) occurs, the drug should be discontinued, and, if necessary, the patient should be treated with appropriate agents, e.g., pressor amines, antihistamines, or corticosteroids.

Prolonged use of Ceclor may result in the overgrowth of nonsusceptible organisms. Careful observation of the patient is essential. If superinfection occurs during therapy, appropriate measures should be taken.

Positive direct Coombs' tests have been reported during treatment with the cephalosporin antibiotics. In hematologic studies or in transfusion cross-matching procedures when antiglobulin tests are performed on the minor side or in Coombs' testing of newborns whose mothers have received cephalosporin antibiotics before parturition, it should be recognized that a positive Coombs' test may be due to the drug.

Ceclor should be administered with caution in the presence of markedly impaired renal function. Under such conditions, careful clinical observation and laboratory studies should be made because safe dosage may be lower than that usually recommended.

As a result of administration of Ceclor, a false-positive reaction for glucose in the urine may occur. This has been observed with Benedict's and Fehling's solutions and also with Clinintest® tablets but not with Tes-Tape® (Glucose Enzymatic Test Strip, USP, Lilly).

Broad-spectrum antibiotics should be prescribed with caution in individuals with a history of gastrointestinal disease, particularly colitis.

Usage in Pregnancy—Pregnancy Category B—Reproduction studies have been performed in mice and rats at doses up to 12 times the human dose and in ferrets given three times the maximum

human dose and have revealed no evidence of impaired fertility or harm to the fetus due to Ceclor (cefactor, Lilly). There are, however, no adequate and well-controlled studies in pregnant women. Because animal reproduction studies are not always predictive of human response, this drug should be used during pregnancy only if clearly needed.

Nursing Mothers—Small amounts of Ceclor have been detected in mother's milk following administration of single 500-mg doses. Average levels were 0.18, 0.20, 0.21, and 0.16 mcg/ml at two, three, four, and five hours respectively. Trace amounts were detected at one hour. The effect on nursing infants is not known. Caution should be exercised when Ceclor is administered to a nursing woman.

Usage in Children—Safety and effectiveness of this product for use in infants less than one month of age have not been established.

Adverse Reactions: Adverse effects considered related to therapy with Ceclor are uncommon and are listed below.

Gastrointestinal symptoms occur in about 2.5 percent of patients and include diarrhea (1 in 70).

Symptoms of pseudomembranous colitis may appear either during or after antibiotic treatment. Nausea and vomiting have been reported rarely.

Hypersensitivity reactions have been reported in about 1.5 percent of patients and include morbilliform eruptions (1 in 100), Pruritus, urticaria, and positive Coombs' tests each occur in less than 1 in 200 patients. Cases of serum-sickness-like reactions (erythema multiforme or the above skin manifestations accompanied by arthritis/arthralgia and, frequently, fever) have been reported. These reactions are apparently due to hypersensitivity and have usually occurred during or following a second course of therapy with Ceclor. Such reactions have been reported more frequently in children than in adults. Signs and symptoms usually occur a few days after initiation of therapy and subside within a few days after cessation of therapy. No serious sequelae have been reported. Antihistamines and corticosteroids appear to enhance resolution of the syndrome.

Cases of anaphylaxis have been reported, half of which have

occurred in patients with a history of penicillin allergy. Other effects considered related to therapy included eosinophilia (1 in 50 patients) and genital pruritus or vaginitis (less than 1 in 100 patients).

Causal Relationship Uncertain—Transient abnormalities in clinical laboratory test results have been reported. Although they were of uncertain etiology, they are listed below to serve as alerting information for the physician.

Hepatic—Slight elevations in SGOT, SGPT, or alkaline phosphatase values (1 in 40).

Hematopoietic—Transient fluctuations in leukocyte count, predominantly lymphocytosis occurring in infants and young children (1 in 40).

Renal—Slight elevations in BUN or serum creatinine (less than 1 in 500) or abnormal urinalysis (less than 1 in 200).

(061782R)

Note: Ceclor® (cefactor, Lilly) is contraindicated in patients with known allergy to the cephalosporins and should be given cautiously to penicillin-allergic patients.

Penicillin is the usual drug of choice in the treatment and prevention of streptococcal infections, including the prophylaxis of rheumatic fever. See prescribing information.

Committee and Commission Appointments 1985-1986

NOTE: The committees listed herein have been authorized by President Kenneth Cosgrove, M.D., and/or as required under the Constitution and Bylaws and the Procedure and Policy Manual. Particular note should be taken of the authorization of the HOUSE OF DELEGATES of a Commission form of organization activity and that all Committees, excepting COMMITTEE ON NOMINATIONS, COUNCIL ON REVIEW AND DEVELOPMENT, MEDIATION COMMITTEE, and COORDINATING COUNCIL OF SPECIALTY SOCIETIES, are segregated under the respective Commission in which the function of the committee logically rests. This will tend to eliminate overlapping and duplication in activity programs and result in coordination of the work of the Society in a manner to lessen the work of the Delegates during the Annual Meeting of the HOUSE OF DELEGATES.

(Superior figures (e.g. 21) indicate the component County Society from which the member emanates, as in the Membership list of the ROSTER.)

COUNCILOR DISTRICTS
Constitution and Bylaws of the
North Carolina Medical Society

Article VI — Section and District Societies

The House of Delegates may divide the scientific work of The Society into appropriate sections, and organize such councilor district societies composed of members of component county societies, as will promote the interests of the profession.

Chapter VII — Councilor Districts

Section 1. To facilitate the organization of the medical profession, the State of North Carolina hereby is divided by counties into ten councilor districts as follows:

First District — Bertie, Chowan-Perquimans, Gates, Hertford, and Pasquotank-Camden-Currituck-Dare.

Second District — Beaufort-Hyde-Martin-Washington-

Tyrrell, Carteret, Craven-Pamlico-Jones, Lenoir-Greene and Pitt.
Third District — Bladen, Brunswick, Columbus, Duplin, New Hanover-Pender, Onslow and Sampson.

Fourth District — Edgecombe, Halifax, Johnston, Nash, Northampton, Warren, Wayne, and Wilson.

Fifth District — Cumberland, Harnett, Hoke, Lee, Moore, Richmond, Robeson, and Scotland.

Sixth District — Alamance-Caswell, Chatham, Durham-Orange, Franklin, Granville, Person, Vance, and Wake.

Seventh District — Anson, Cabarrus, Cleveland, Gaston, Lincoln, Mecklenburg, Montgomery, Rutherford, Stanly, and Union.

Eighth District — Ashe-Alleghany, Forsyth-Stokes-Davie, Guilford, Randolph, Rockingham, Surry-Yadkin, and Wilkes.

Ninth District — Alexander, Avery, Burke, Caldwell, Catawba, Davidson, Iredell, McDowell, Rowan, and Watauga.

Tenth District — Buncombe, Cherokee, Graham, Haywood, Henderson, Jackson, Macon-Clay, Madison, Mitchell-Yancey, Polk, Swain, and Transylvania.

Times Are Changing ...And So Must You

Saturn 3000 a full disclosure cassette Holter scanner offers your practice newly created professional and economic opportunities.

Saturn 3000 is fully editable, completely verifiable and six (6) final reports offer you a wealth of highly interpretable diagnostic information.

Best of all it's simple to operate and easy to maintain. It takes less than 15 minutes to complete a study, allowing you immediate patient assessment and perscription.

Lewis Medical Instruments, exclusive dealers of Saturn 3000, has over 20 years of sales and service experience to the North Carolina medical community.

Our knowledgeable sales representatives and expertly equipped technical service department assure that you will receive quality instrumentation and continuous service support to provide you with the best value for your investment.

Increased opportunity, high-quality instrumentation and excellent service is why you should call (919) 848-4333 today for your no obligation product demonstration.

gets to
the heart
of the matter**

LEWIS MEDICAL INSTRUMENTS INC.

When prescribing, see complete prescribing information in SK&F CO. literature or PDR. The following is a brief summary.

WARNING

This drug is not indicated for initial therapy of edema or hypertension. Edema or hypertension requires therapy titrated to the individual. If this combination represents the dosage so determined, its use may be more convenient in patient management. Treatment of hypertension and edema is not static, but must be reevaluated as conditions in each patient warrant.

Contraindications: Concomitant use with other potassium-sparing agents such as spironolactone or amiloride. Further use in anuria, progressive renal or hepatic dysfunction, hyperkalemia. Pre-existing elevated serum potassium. Hypersensitivity to either component or other sulfonamide-derived drugs.

Warnings: Do not use potassium supplements, dietary or otherwise, unless hypokalemia develops or dietary intake of potassium is markedly impaired. If supplementary potassium is needed, potassium tablets should not be used. Hyperkalemia can occur, and has been associated with cardiac irregularities. It is more likely in the severely ill, with urine volume less than 1 liter/day, the elderly and diabetics with suspected or confirmed renal insufficiency. Periodically, serum K⁺ levels should be determined. If hyperkalemia develops, substitute a thiazide alone, restrict K⁺ intake. Associated widened QRS complex or arrhythmia requires prompt additional therapy. Thiazides cross the placental barrier and appear in cord blood. In pregnancy requires weighing anticipated benefits against possible hazards, including fetal or neonatal jaundice, thrombocytopenia, and other adverse reactions seen in adults. Thiazides appear and triamterene may appear in breast milk. If their use is essential, the patient should stop nursing. Adequate information on use in children is not available. Sensitivity reactions may occur in patients with or without a history of allergy or bronchial asthma. Possible exacerbation or activation of systemic lupus erythematosus has been reported with thiazide diuretics.

Precautions: The bioavailability of the hydrochlorothiazide component of 'Dyazide' is about 50% of the bioavailability of the single entity. Theoretically, a patient transferred from the single entities of Dyrenium (triamterene, Ciba) and hydrochlorothiazide may show an increase in blood pressure due to fluid retention. Similarly, it is also possible that the lesser hydrochlorothiazide bioavailability could lead to increased serum potassium levels. However, extensive clinical experience with 'Dyazide' suggests that these conditions have not been commonly observed in clinical practice. Do periodic serum electrolyte determinations (particularly important in patients receiving excessively or receiving parenteral fluids, and during concurrent therapy with amphotericin B or corticosteroids or corticotropin [ACTH]). Periodic BUN and serum creatinine determinations should be made, especially in the elderly, diabetics or those with suspected or confirmed renal insufficiency. Cumulative effects of the drug may develop in patients with impaired renal function. Thiazides should be used with caution in patients with impaired hepatic function. They can precipitate coma in patients with severe liver disease. Observe regularly for possible blood dyscrasias, liver damage, other idiosyncratic reactions. Blood dyscrasias have been reported in patients receiving triamterene, and leukopenia, thrombocytopenia, agranulocytosis, and aplastic and hemolytic anemia have been reported with thiazides. Thiazides may cause manifestation of latent diabetes mellitus. The effects of oral anticoagulants may be decreased when used concurrently with hydrochlorothiazide; dosage adjustments may be necessary. Clinically insignificant reductions in arterial responsiveness to norepinephrine have been reported. Thiazides have also been shown to increase the paralyzing effect of nondepolarizing muscle relaxants such as tubocurarine. Triamterene is a weak folic acid antagonist. Periodic blood studies in cirrhotics with splenomegaly. Antihypertensive effects may be enhanced in post-sympathectomy patients. Use cautiously in surgical patients. Triamterene has been found in renal stones in association with the other usual calculus components. Therefore, 'Dyazide' should be used with caution in patients with histories of stone formation. Recurrences of acute renal failure have been reported in patients on 'Dyazide' when treated with indomethacin. Therefore, caution is advised in administering nonsteroidal anti-inflammatory agents with 'Dyazide'. The following may occur: transient elevated BUN or creatinine or both, hyperkalemia and glycosuria (diabetic insulin requirements may be altered), uricemia and gout, digitalis intoxication (in hypokalemia), decreasing lithium reserve with possible metabolic acidosis. 'Dyazide' interferes with fluorescent measurement of quinidine. Hypokalemia is uncommon with 'Dyazide', but should it develop, corrective measures should be taken such as potassium supplementation or increased dietary intake of potassium-rich foods. Corrective measures should be instituted cautiously and serum potassium levels determined. Discontinue corrective measures and 'Dyazide' should laboratory values reveal elevated serum potassium. A chloride deficit may occur as well as dilutional hyponatremia. Concurrent therapy with chlorpropamide may increase the risk of severe hyponatremia. Serum PBI levels may decrease without signs of thyroid disturbance. Calcium excretion is decreased by thiazides. 'Dyazide' should be withdrawn before conducting tests for parathyroid function.

Thiazides may add to or potentiate the action of other antihypertensive agents. Thiazides reduce renal clearance of lithium and increase the risk of lithium toxicity.

Adverse Reactions: Muscle cramps, weakness, dizziness, headache, dry mouth, anaphylaxis, rash, urticaria, photosensitivity, purpura, other dermatological conditions; nausea and vomiting, diarrhea, constipation, other gastrointestinal disturbances; postural hypotension (may be aggravated by alcohol, barbiturates, or narcotics). Necrotizing vasculitis, paresthesias, pancreatitis, xanthopsia and respiratory distress including pneumonia and pulmonary edema, transient blurred vision, sialadenitis, and goiter have occurred with thiazides alone. Triamterene has been found in renal stones in association with other usual calculus components. Rare instances of acute interstitial nephritis have been reported. Impotence has been reported in a few patients on 'Dyazide', although a causal relationship has not been established.

Dispensing: 'Dyazide' is supplied as a red and white capsule, in bottles of 100 capsules; Single Unit Packages (unit-dose) of 100 (intended for hospital use only); in Patient-Pak™ unit-of-use bottles of 100.

DYAZIDE®

25 mg Hydrochlorothiazide/50 mg Triamterene/SKF

Over 19 Years of Confidence

a product of
SK&F CO.

Carolina, P.R. 00630

The unique
red and white
Dyazide® capsule:
Your assurance of
SK&F quality.

Help her compute America's future.

Today, our children are computing basic math. Tomorrow, they'll be programming the future.

But before they can fill the computer screen with new information, we'll have to help fill their minds. With ideas. Information. Dreams. With the stimulation only a first-rate college education can provide.

But they'll need your help.

Because only with your help will colleges be able to cope with the high cost of learning.

Rising costs and shrinking revenues are threatening the ability of colleges to provide the kind of education tomorrow's leaders will need to solve tomorrow's problems.

So please give generously to the college of your choice.

You'll be programming America for success for years to come.

Give to the college of your choice.

Our special commitment to the future . . .

GENESIS

recovery program for addictive diseases
at
CHARTER MANDALA CENTER

Announcing the expansion of our services to include the most comprehensive treatment for the diseases of alcoholism and drug addiction. This new 24 bed facility with comfortable and modern accommodations is located on the campus of Charter Mandala Center Psychiatric Hospital in Winston-Salem, North Carolina. Under the direction of Dr. Robert W. McDermott, the addictive disease treatment program is now accepting patients for evaluation and admission.

CHARTER MANDALA CENTER
3637 Old Vineyard Road
Winston-Salem, NC 27104

EMPLOYEES APPRECIATE THE PAYROLL SAVINGS PLAN.

JUST ASK THE PEOPLE AT MANUFACTURERS HANOVER.

"Savings Bonds provide a good interest rate. Moreover, the payroll deduction is a convenient way to save." —James F. Howard

"With market-based interest rates, Savings Bonds are a secure and competitive savings instrument."

—Suzanne O'Toole

"With a guaranteed minimum of 7.5%, there is no risk to principal and appreciation is assured."

—Mark Young

U.S. Savings Bonds now offer higher, variable interest rates *and* a guaranteed return. Your employees will appreciate that. They'll also appreciate your giving them the easiest, surest way to save.

For more information, write to: Steven R. Mead,
Executive Director, U.S. Savings Bonds Division,
Department of the Treasury, Washington, DC 20226.

U.S. SAVINGS BONDS  **Paying Better Than Ever**

A public service of this publication.

MANAGE YOUR OFFICE MORE EFFECTIVELY WITH THE MPM 1000 SYSTEM AVAILABLE THROUGH SOUTHERN MEDICAL ASSOCIATIONS PHYSICIANS' PURCHASING PROGRAM

Manage your office more effectively with the MPM 1000 System available through the Physicians' Purchasing Program.

Managing your office shouldn't be hard; however, with the current insurance requirements and

the impending Medicare changes looming on the horizon, it will get more difficult. You should call Curtis 1000 Information Systems or Southern Medical Association to find out how the MPM 1000 can help make your practice run more effectively.

AVAILABLE ON IBM A/T

MPM 1000 Simplifies Your Paperwork

You will be able to reduce the mountains of paperwork by using your MPM 1000 system to process all your insurance, complete your billing plus instantaneously sort and file necessary information.

MPM 1000 Speeds Up Your Cash Flow

The MPM 1000 system will increase your daily bank deposits by processing all your insurance and patients' receivables quickly.

MPM 1000 Improves Your Practice Management

With the MPM 1000 system you can easily and intelligently manage your practice with computer generated reports. Trends and problems are easily identified so you can take corrective action before they become serious.

MPM 1000 Is A One Source Solution

The MPM 1000 is a one source solution. With your system you receive all hardware (IBM or Texas Instruments), software, complete five day training program and responsive after sale support.

IBM PC/AT At Discount

Best of all, these systems are available through SMA Services, Inc., Physicians' Purchasing Program with substantial discounts on IBM and Texas Instrument equipment.

FOR MORE INFORMATION, please fill out the coupon below and mail it to Southern Medical Association, or for faster service call Southern Medical at (205) 945-1840 or Curtis 1000 Information Systems at 800-241-4780.

YES! I would like more information on MPM 1000

AFTER BREAKTHROUGH BLEEDING AND AMENORRHEA...
SHE'S ABOUT TO GIVE UP ON ORAL CONTRACEPTION.

NORLESTRIN[®]

*(1 mg norethindrone
acetate and 50 mcg ethinyl
estradiol tablets)
U.S.P. 150*

BECAUSE SOMETIMES A 50 IS PREFERABLE.

See next page for oral summary of prescribing information.

Brief Summary of Prescribing Information

NORLESTRIN[®] (norethindrone acetate and ethinyl estradiol tablets, USP)

See section under **Special Notes on Administration and HOW SUPPLIED.**

Before prescribing, please see full prescribing information. A Brief Summary follows.

DESCRIPTION

Norlestrin Products are progestogen-estrogen combinations.

INDICATIONS AND USAGE

Norlestrin Products are indicated for the prevention of pregnancy in women who elect to use oral contraceptives as a method of contraception.

In clinical trials with Norlestrin 1/50 involving 25,983 therapy cycles, there was a pregnancy rate of 0.05 per 100 woman-years, in clinical trials with Norlestrin 2.5/50 involving 96,388 cycles, there was a pregnancy rate of 0.22 per 100 woman-years.

Dose-Related Risk of Thromboembolism from Oral Contraceptives: Studies have shown a positive association between the dose of estrogens in oral contraceptives and the risk of thromboembolism. It is prudent and in keeping with good principles of therapeutics to minimize exposure to estrogen. The oral contraceptive prescribed for any given patient should be that product which contains the least amount of estrogen that is compatible with an acceptable pregnancy rate and patient acceptance.

CONTRAINDICATIONS

- 1 Thrombophlebitis or thromboembolic disorders
- 2 A past history of deep-vein thrombophlebitis or thromboembolic disorders
- 3 Cerebral vascular or coronary artery disease
- 4 Known or suspected carcinoma of the breast
- 5 Known or suspected estrogen-dependent neoplasia
- 6 Undiagnosed abnormal genital bleeding
- 7 Known or suspected pregnancy (See **WARNING** No. 5)
- 8 Benign or malignant liver tumor which developed during the use of oral contraceptives or other estrogen-containing products

WARNINGS

Cigarette smoking increases the risk of serious cardiovascular side effects from oral contraceptive use. The risk increases with age and with heavy smoking (15 or more cigarettes per day) and is quite marked in women over 35 years of age. Women who use oral contraceptives should be strongly advised not to smoke.

The use of oral contraceptives is associated with increased risk of several serious conditions including thromboembolism, stroke, myocardial infarction, hepatic adenoma, gallbladder disease, and hypertension. Practitioners prescribing oral contraceptives should be familiar with the following information relating to these risks:

1 **Thromboembolic Disorders and Other Vascular Problems.** An increased risk of thromboembolic and thrombotic disease associated with the use of oral contraceptives is well-established. Studies have demonstrated an increased risk of fatal and nonfatal venous thromboembolism and stroke, both hemorrhagic and thrombotic.

Cerebrovascular Disorders: In a collaborative study in women with and without predisposing causes, it was estimated that the risk of hemorrhagic stroke was 2.0 times greater in users than nonusers, and the risk of thrombotic stroke was 4.0 to 9.5 times greater.

Myocardial Infarction: An increased risk of myocardial infarction associated with oral contraceptives has been reported confirming a previously suspected association. These studies found that the greater the number of underlying risk factors (cigarette smoking, hypertension, hypercholesterolemia, obesity, diabetes, history of preclampsic toxemia) for coronary artery disease, the higher the risk of developing myocardial infarction, regardless of whether the patient was an oral contraceptive user or not. Oral contraceptives, however, were found to be a clear additional risk factor.

It has been estimated that users who do not smoke (smoking is considered a major predisposing condition to myocardial infarction) are about twice as likely to have a fatal myocardial infarction as nonusers who do not smoke. Oral contraceptive users who are smokers have about a tenfold increased risk of fatal infarction compared to users who do not smoke, but about a tenfold to twelvefold increased risk compared to nonusers who do not smoke. The amount of smoking is also an important factor.

Risk of Dose: In an analysis of data, British investigators concluded that the risk of thromboembolism, including coronary thrombosis, is directly related to the dose of estrogen used in oral contraceptives, however the quantity of estrogen may not be the sole factor involved.

Persistence of Risk: Two studies have suggested that an increased risk may persist for as long as 6 years after discontinuation of oral contraceptive use for cerebrovascular disease and 9 years for myocardial infarction. In addition, a prospective study suggested the persistence of risk for subarachnoid hemorrhage.

Estimate of Excess Mortality from Circulatory Diseases: The risk of diseases of the circulatory system is concentrated in older women in those with a long duration of use, and in cigarette smokers.

A study of available data from a variety of sources concluded that the mortality associated with all methods of birth control is low and below that associated with childbirth, with the exception of oral contraceptives in women over 40 who smoke.

The risk of thromboembolic and thrombotic diseases associated with oral contraceptives increases with age after approximately age 30 and for myocardial infarction, is further increased by hypertension, hypercholesterolemia, obesity, diabetes, or history of preclampsic toxemia, and especially by cigarette smoking.

The physician and the patient should be alert to the earliest manifestations of thromboembolic and thrombotic disorders. Should any occur or be suspected, the drug should be discontinued immediately.

A fourfold to sixfold increased risk of postsurgery thromboembolic complications has been reported in users. If feasible, oral contraceptives should be discontinued at least four weeks before surgery of a type associated with an increased risk of thromboembolism or prolonged immobilization.

2 **Ocular Lesions.** Neuro-ocular lesions, such as optic neuritis or retinal thrombosis, have been associated with the use of oral contraceptives. Discontinue the oral contraceptive if there is unexplained sudden or gradual, partial or complete loss of vision, onset of proptosis or diplopia, papilledema, or retinal vascular lesions.

3 **Carcinoma.** Long-term continuous administration of estrogen in certain animal species increases the frequency of carcinoma of the breast, cervix, vagina, and liver.

In humans, an increased risk of endometrial carcinoma associated with the prolonged use of exogenous estrogen in postmenopausal women has been reported. However, there is no evidence suggesting an increased risk of endometrial cancer in users of conventional combination or progestogen-only oral contraceptives.

Studies found no evidence of increase in breast cancer in women taking oral contraceptives, however an excess risk in users with documented benign breast disease was reported.

There is no confirmed evidence of an increased risk of cancer associated with oral contraceptives. Close clinical surveillance of users is nevertheless essential. In cases of undiagnosed persistent or recurrent abnormal vaginal bleeding, appropriate diagnostic measures should be taken to rule out malignancy. Women with a strong family history of breast cancer or who have breast nodules, fibrocystic disease, or abnormal mammograms, should be monitored with particular care.

4 **Hepatic Tumors.** Benign hepatic adenomas have been found to be associated with oral contraceptives. Because hepatic adenomas may rupture and may cause death through intra-abdominal hemorrhage, they should be considered in women presenting abdominal pain and tenderness, abdominal mass, or shock.

A few cases of hepatocellular carcinoma have been reported in women taking oral contraceptives. The relationship of these drugs to this type of malignancy is not known at this time.

5 **Usage in or Immediately Preceding Pregnancy, Birth Defects in Offspring, and Malinancy in Female Offspring.** During early pregnancy, female sex hormones may seriously damage the offspring.

An increased risk of congenital anomalies, including heart defects and limb defects, has been reported with the use of oral contraceptives in pregnancy.

There is some evidence that triploidy and possible other types of polyploidy are increased among abortuses from women who became pregnant soon after ceasing oral contraceptives.

Pregnancy should be ruled out before continuing an oral contraceptive in any patient who has missed two consecutive menstrual periods if the patient has not adhered to the sched-

ule. The possibility of pregnancy should be considered at the time of the first missed period, and oral contraceptives should be withheld until pregnancy has been ruled out. If pregnancy is confirmed, the patient should be apprised of the potential risks to the fetus and the advisability of continuation of the pregnancy should be discussed.

Women who discontinue oral contraceptives with the intent of becoming pregnant should use an alternate form of contraception for a period of time before attempting to conceive.

Administration of progestogen-only or progestogen-estrogen combinations to induce withdrawal bleeding should not be used as a test of pregnancy.

6 **Gallbladder Disease.** Studies report an increased risk of surgically confirmed gallbladder disease in users of oral contraceptives.

7 **Carbohydrate and Lipid Metabolic Effects.** Because decreased glucose tolerance has been observed in a significant percentage of patients, prediabetic and diabetic patients should be carefully observed while receiving oral contraceptives.

An increase in triglycerides and total phospholipids has been observed.

8 **Elevated Blood Pressure.** An increase in blood pressure has been reported in patients receiving oral contraceptives. The prevalence in users increases with longer exposure. Age is also strongly correlated with development of hypertension. Women who previously have had hypertension during pregnancy may be more likely to develop elevation of blood pressure.

9 **Headache.** Onset or exacerbation of migraine or development of headache of a new pattern which is recurrent, persistent, or severe, requires discontinuation of oral contraceptives.

10 **Bleeding Irregularities.** Breakthrough bleeding, spotting, and amenorrhea are frequent reasons for patients discontinuing oral contraceptives. In breakthrough bleeding, nonfunctional causes should be borne in mind. In undiagnosed abnormal bleeding from the vagina, adequate diagnostic measures are indicated to rule out pregnancy or malignancy.

Women with a past history of oligomenorrhea or secondary amenorrhea or young women without regular cycles should be advised that they may have a tendency to remain anovulatory or to become amenorrheic after discontinuation of oral contraceptives.

11 **Ectopic Pregnancy.** Ectopic as well as intrauterine pregnancy may occur in contraceptive failures.

12 **Breast-Feeding.** Oral contraceptives may interfere with lactation. Furthermore, a small fraction of the hormonal agents in oral contraceptives has been identified in the milk of mothers receiving these drugs.

PRECAUTIONS

1 A complete medical and family history should be taken prior to the initiation of oral contraceptives. The pretreatment and periodic physical examinations should include special reference to blood pressure, breasts, abdomen, and pelvic organs, including Papanicolaou smear and relevant laboratory tests. As a general rule, oral contraceptives should not be prescribed for longer than one year without another examination.

2 Preexisting uterine leiomyomata may increase in size.

3 Patients with a history of psychic depression should be carefully observed and the drug discontinued if depression recurs to a serious degree.

4 Oral contraceptives may cause fluid retention and should be prescribed with caution, and only with careful monitoring, in patients with conditions which might be aggravated.

5 Patients with a past history of jaundice during pregnancy have an increased risk of recurrence of jaundice. If jaundice develops, the medication should be discontinued.

6 Steroid hormones may be poorly metabolized and should be administered with caution in patients with impaired liver function.

7 Users may have disturbances in normal tryptophan metabolism, which may result in a relative pyridoxine deficiency.

8 Serum folate levels may be depressed.

9 The pathologist should be advised of oral contraceptive therapy when relevant specimens are submitted.

10 Certain endocrine and liver function tests and blood components may be affected:

- (a) Increased sulfobromophthalen retention
- (b) Increased prothrombin and factors VII, VIII, IX, and X, decreased antithrombin III, increased norepinephrine-induced platelet aggregability
- (c) Increased thyroid-binding globulin (TBG) leading to increased circulating total thyroid hormone
- (d) Decreased pregnandiol excretion
- (e) Reduced response to metyrapone test

Drug Interactions: Reduced efficacy and increased incidence of breakthrough bleeding have been associated with concomitant use of rifampin. A similar association has been suggested with barbiturates, phenylbutazone, phenytoin sodium, tetracycline, and ampicillin.

ADVERSE REACTIONS

An increased risk of the following serious adverse reactions has been associated with oral contraceptives: thrombophlebitis, pulmonary embolism, coronary thrombosis, cerebral thrombosis, cerebral hemorrhage, hypertension, gallbladder disease, benign hepatomas, congenital anomalies.

There is evidence of an association between the following conditions and the use of oral contraceptives, although additional confirmatory studies are needed: mesenteric thrombosis, neuro-ocular lesions, eg, retinal thrombosis and optic neuritis.

The following adverse reactions have been reported in patients receiving oral contraceptives and are believed to be drug related, nausea and/or vomiting, usually the most common adverse reactions, occur in approximately 10% or less of patients during the first cycle. Other reactions, as a general rule, are seen much less frequently or only occasionally: gastrointestinal symptoms, breakthrough bleeding, spotting, change in menstrual flow, dysmenorrhea, amenorrhea during and after treatment, temporary infertility after discontinuance of treatment, edema, chloasma or melasma, breast changes, change in weight, change in cervical erosion and cervical secretion, possible diminution in lactation when given immediately postpartum, cholestatic jaundice, migraine, increase in size of uterine leiomyomata, rash (allergic), mental depression, reduced tolerance to carbohydrates, vaginal candidiasis, change in corneal curvature, intolerance to contact lenses.

The following adverse reactions have been reported and the association has been neither confirmed nor ruled out: premenstrual-like syndrome, cataracts, changes in libido, chorea, changes in appetite, cystitis-like syndrome, headache, nervousness, dizziness, hirsutism, loss of scalp hair, erythema multiforme, erythema nodosum, hemorrhagic eruption, vaginitis, porphyria.

Special Notes on Administration

Menstruation usually begins two or three days, but may begin as late as the fourth or fifth day after discontinuing medication.

After several months on treatment, bleeding may be reduced to a point of virtual absence, reduced flow may be a result of medication and not indicative of pregnancy.

HOW SUPPLIED

Norlestrin (21) 1/50 is available in compacts each containing 21 tablets. Each tablet contains 1 mg of norethindrone acetate and 50 mcg of ethinyl estradiol. Available in packages of five compacts and packages of five refills.

Norlestrin (21) 2.5/50 is available in compacts each containing 21 tablets. Each tablet contains 2.5 mg of norethindrone acetate and 50 mcg of ethinyl estradiol. Available in packages of five compacts and packages of five refills.

Norlestrin (28) 1/50 is available in compacts each containing 21 yellow tablets and 7 brown tablets. Each yellow tablet contains 1 mg of norethindrone acetate and 50 mcg of ethinyl estradiol. Each brown tablet contains 75 mcg of ferrous fumarate, USP. Available in packages of five compacts and packages of five refills.

Norlestrin (28) 2.5/50 is available in compacts each containing 21 pink tablets and 7 brown tablets. Each pink tablet contains 2.5 mg of norethindrone acetate and 50 mcg of ethinyl estradiol. Each brown tablet contains 75 mcg of ferrous fumarate, USP. Available in packages of five compacts and packages of five refills.

Norlestrin (28) 1/50 is available in compacts each containing 21 yellow tablets and 7 white inert tablets. Each yellow tablet contains 1 mg of norethindrone acetate and 50 mcg of ethinyl estradiol. Available in packages of five compacts and packages of five refills. U901G131

STUDENT MEMBERSHIP

By authority of the Executive Council, a medical student membership is provided. This class of membership expires immediately upon completion of training in a recognized school of medicine located in North Carolina. Residents of North Carolina enrolled in a recognized school of medicine in another state are eligible for such membership.

Alphabetical List of Members

Fifty Year Club

The House of Delegates of the North Carolina Medical Society in May of 1953, authorized the Executive Council of the Society to establish a special recognition for those physicians residing in the State of North Carolina who were members currently of the State Medical Society, who had established legal practice of medicine and who had actively practiced medicine during their life time for a period of fifty years.

Listed below in alphabetical order are the names and addresses of those physicians who resided in North Carolina and whom the North Carolina Medical Society has recognized as members of the FIFTY YEAR CLUB of the State Medical Society. This list will be added to from year to year and likewise subtracted from as losses to this club group are sustained and reckoned.

The listing for 1985 only may include Fifty Year Club members who have passed away since their recognition. The list for other years will include only those members surviving.

- 1966**—McChesney, W. W., M.D., Gastonia
Foster, Malcolm Tennyson, Sr., M.D., Fayetteville
Harbach, Francis Oliver, M.D., Bunn Level
Kempner, Walter, M.D., Durham
Love, J. Grafton, M.D., Rochester, Minn.
MacRae, John Donald, M.D., Dunedin, Fla.
Moss, George Oren, M.D., Forest City
Richman, Samuel, M.D., Greensboro
- 1968**—Lawrence, Benjamin J., Sr., M.D., Pace, Virginia
Smith, Claiborne Thweat, M.D., Rocky Mount
- 1969**—Hubbard, Frederick Cecil, M.D., Wilkesboro
Marsh, Frank Baker, M.D., Salisbury
Willis, Henry Stuart, M.D., Chapel Hill
- 1970**—Dewar, William Banks, M.D., Raleigh
Lovell, Thomas Claude, M.D., Henrietta
Lyday, Russell Osborne, M.D., Greensboro
- 1971**—Caviness, Verne Strudwick, M.D., Raleigh
Geddie, Kenneth Baxter, M.D., High Point
Lutterloh, Isaac Hayden, Sr., M.D., Sanford
Norburn, Charles S., M.D., Biltmore
- 1973**—Chidester, A. B., M.D., Hendersonville
Griffin, Harold Walker, M.D., Hickory
Prather, Fonzo Goff, M.D., Asheville
Robertson, John Newton, M.D., Fayetteville
Shaw, John Alexander, M.D., Fayetteville
- 1974**—Best, Deleon Edward, M.D., Goldsboro
Bowles, Francis Norman, M.D., Durham
Goley, Willard Coe, M.D., Graham
Monroe, Clement R., M.D., Pinehurst
Sloan, Allen Barry, M.D., Charlotte
- 1975**—Ader, Ottis Ladeau, M.D., Durham
Dale, Grover Cleveland, M.D., Goldsboro
Hart, Oliver James, Sr., M.D., Winston-Salem
Howard, Corbett Etheridge, M.D., Goldsboro
Little, Lonnie Marcus, M.D., Statesville
Norburn, Russell Lee, M.D., Asheville
Whaley, James Davant, M.D., Hickory
Winstead, John Lindsay, M.D., Greenville
- 1976**—Bennett, Ernest Claxton, M.D., Elizabethtown
Combs, Joseph John, M.D., Raleigh
Davis, Philip Bibb, M.D., High Point
Nowlin, George Preston, M.D., Charlotte
Royal, Donnie Martin, M.D., Salemburg
Tuggle, Allan Davis, M.D., Charlotte
Young, John Clingman, M.D., Asheville
- 1977**—Battle, Newsome P., M.D., Rocky Mount
Brown, Kermit English, M.D., Asheville
Easom, Herman Franklin, M.D., Wilson
Felton, Robert Lee, Jr., M.D., Carthage
- 1978**—Houser, Forest Melville, M.D., Cherryville
Hunter, John Baldwin, M.D., Shelby
Leonard, Jacob Calvin, Jr., M.D., Lexington
Newland, Charles Logan, M.D., Brevard
Ogburn, Lundie Calvin, M.D., Winston-Salem
Richardson, William Perry, M.D., Chapel Hill
- 1979**—Anthony, William Augustus, M.D., Gastonia
Baldwin, Marie, M.D., Asheville
Covington, John M. C., M.D., Roanoke Rapids
Floyd, William Russel, M.D., Concord
Kendall, Benjamin Horton, M.D., Shelby
Kneedler, William Harding, M.D., Concord
McDowell, Roy Hendrix, M.D., Belmont
McLain, John Edward G., M.D., Durham
Morris, Rae Henderson, M.D., Concord
Rhodes, John Sloan, M.D., Raleigh
Weinzenblatt, Sprinza, M.D., Asheville
- 1980**—Beavers, James Wallace, M.D., Greensboro
Bird, Ignacio, M.D., Greensboro
Bonner, Merle Dumont, M.D., Greensboro
Cathell, Edwin Jennings, M.D., Lexington
Cook, William Eugene, M.D., Fayetteville
Crowell, Lester Avant, Jr., M.D., Lincolnton
Crumpler, James Fulton, M.D., Rocky Mount
Duffy, Charles, M.D., New Bern
Hare, Ransom Bryant, Jr., M.D., Black Mountain
Hendrix, James Paisley, M.D., Durham
Herring, Edward Humphrey, M.D., Raleigh
Jaynes, Grace S., M.D., Tryon
LeBauer, Maurice Leon, M.D., Greensboro
LeBauer, Sidney Ferring, M.D., Greensboro
Lewis, Clifford Whitfield, M.D., High Point
Orgain, Edward Stewart, M.D., Durham
Ormond, Allison Lee, M.D., Hickory
Owens, Zack Doxey, M.D., Camden
Peede, Alvin Wortham, M.D., Lillington
Roberson, Robert Stuart, M.D., Hazelwood
Robinson, Charles Wilson, M.D., Charlotte
Seay, Hillis Ledbetter, M.D., Huntersville
Shaw, Lloyd R., M.D., Statesville
Wilson, Stephen Glenn, Sr., M.D., Angier

Medicalis™

the state of the art in practice management

"It is unusual to find a system that is fast and easy to use, offers comprehensive features, and provides flexibility for users' needs, together in a low-cost package that is superior to much of the competition. Medicalis, by Articulate Publications, Inc. is an excellent example of what a medical practice management software package should provide."

Claude Houston, *Update: Computers in Medicine*
January 1985

Features

- custom screen displays for practice-specific needs
 - extensive generic search
 - add codes on the spot
 - electronic and diskette billing
- automatic tracing of insurance benefits
 - patient recordkeeping
- patient recall and correspondence
- unlimited number of forms and custom reports on clinical and financial data maintained in any format
 - simultaneous access to 16 users
- specialized versions for anesthesiology and radiology
- reporting for multi-site practices

BALANCED CALCIUM CHANNEL BLOCKADE!

CARDIZEM[®]
(diltiazem HCl)

balances
potent
coronary
vasodilation
with a low
incidence of
side effects

Low incidence of side effects
CARDIZEM[®] (diltiazem HCl) produces an incidence of adverse reactions not greater than that reported with placebo therapy, thus contributing to the patient's sense of well-being.

*Cardizem is indicated in the treatment of angina pectoris due to coronary artery spasm and in the management of chronic stable angina (classic effort-associated angina) in patients who cannot tolerate therapy with beta-blockers and/or nitrates or who remain symptomatic despite adequate doses of these agents.

Reduces angina attack frequency*
42% to 46% decrease reported in multicenter study¹.

Increases exercise tolerance*
In Bruce exercise test,² control patients averaged 8.0 minutes to onset of pain; Cardizem patients averaged 9.8 minutes ($P < .005$).

CARDIZEM[®]
(diltiazem HCl)

**THE BALANCED
CALCIUM CHANNEL BLOCKER**

PROFESSIONAL USE INFORMATION

DESCRIPTION

CARDIZEM (diltiazem hydrochloride) is a calcium ion influx inhibitor (slow channel blocker or calcium antagonist). Chemically, diltiazem hydrochloride is 1,5-Benzothiazepin-4(5H)-one, 3-(acetyloxy)-5-[2-(dimethylamino)ethyl]-2,3-dihydro-2-(4-methoxyphenyl)-, monohydrochloride, (+) - cis-. The chemical structure is:

Diltiazem hydrochloride is a white to off-white crystalline powder with a bitter taste. It is soluble in water, methanol, and chloroform. It has a molecular weight of 450.98. Each tablet of CARDIZEM contains either 30 mg or 60 mg diltiazem hydrochloride for oral administration.

CLINICAL PHARMACOLOGY

The therapeutic benefits achieved with CARDIZEM are believed to be related to its ability to inhibit the influx of calcium ions during membrane depolarization of cardiac and vascular smooth muscle.

Mechanisms of Action. Although precise mechanisms of its antianginal actions are still being delineated, CARDIZEM is believed to act in the following ways:

1. Angina Due to Coronary Artery Spasm. CARDIZEM has been shown to be a potent dilator of coronary arteries both epicardial and subendocardial. Spontaneous and ergonovine-induced coronary artery spasm are inhibited by CARDIZEM.
2. Exertional Angina. CARDIZEM has been shown to produce increases in exercise tolerance, probably due to its ability to reduce myocardial oxygen demand. This is accomplished via reductions in heart rate and systemic blood pressure at submaximal and maximal exercise work loads.

In animal models, diltiazem interferes with the slow inward (depolarizing) current in excitable tissue. It causes excitation-contraction uncoupling in various myocardial tissues without changes in the configuration of the action potential. Diltiazem produces relaxation of coronary vascular smooth muscle and dilation of both large and small coronary arteries at drug levels which cause little or no negative inotropic effect. The resultant increases in coronary blood flow (epicardial and subendocardial) occur in ischemic and nonischemic models and are accompanied by dose-dependent decreases in systemic blood pressure and decreases in peripheral resistance.

Hemodynamic and Electrophysiologic Effects. Like other calcium antagonists, diltiazem decreases sinoatrial and atrioventricular conduction in isolated tissues and has a negative inotropic effect in isolated preparations. In the intact animal, prolongation of the AH interval can be seen at higher doses.

In man, diltiazem prevents spontaneous and ergonovine-provoked coronary artery spasm. It causes a decrease in peripheral vascular resistance and a modest fall in blood pressure and, in exercise tolerance studies in patients with ischemic heart disease, reduces the heart rate-blood pressure product for any given work load. Studies to date, primarily in patients with good ventricular function, have not revealed evidence of a negative inotropic effect; cardiac output, ejection fraction, and left ventricular end diastolic pressure have not been affected. There are as yet few data on the interaction of diltiazem and beta-blockers. Resting heart rate is usually unchanged or slightly reduced by diltiazem.

Intravenous diltiazem in doses of 20 mg prolongs AH conduction time and AV node functional and effective refractory periods approximately 20%. In a study involving single oral doses of 300 mg of CARDIZEM in six normal volunteers, the average maximum PR prolongation was 14% with no instances of greater than first-degree AV block. Diltiazem-associated prolongation of the AH interval is not more pronounced in patients with first-degree heart block. In patients with sick sinus syndrome, diltiazem significantly prolongs sinus cycle length (up to 50% in some cases).

Chronic oral administration of CARDIZEM in doses of up to 240 mg/day has resulted in small increases in PR interval, but has not usually produced abnormal prolongation. There were, however, three instances of second-degree AV block and one instance of third-degree AV block in a group of 959 chronically treated patients.

Pharmacokinetics and Metabolism. Diltiazem is absorbed from the tablet formulation to about 80% of a reference capsule and is subject to an extensive first-pass effect, giving an absolute bioavailability (compared to intravenous dosing) of about 40%. CARDIZEM undergoes extensive hepatic metabolism in which 2% to 4% of the unchanged drug appears in the urine. In vitro binding studies show CARDIZEM is 70% to 80% bound to plasma proteins. Competitive ligand binding studies have also shown CARDIZEM binding is not altered by therapeutic concentrations of digoxin, hydrochlorothiazide, phenylbutazone, propranolol, salicylic acid, or warfarin. Single oral doses of 30 to 120 mg of CARDIZEM result in detectable plasma levels within 30 to 60 minutes and peak plasma levels two to three hours after drug administration. The plasma elimination half-life following single or multiple drug administration is approximately 3.5 hours. Desacetyl diltiazem is also present in the plasma at levels of 10% to 20% of the parent drug and is 25% to 50% as potent a coronary vasodilator as diltiazem. Therapeutic blood levels of CARDIZEM appear to be in the range of 50 to 200 ng/ml. There is a departure from dose-linearity when single doses above 60 mg are given; a 120-mg dose gave blood levels three times that of the 60-mg dose. There is no information about the effect of renal or hepatic impairment on excretion or metabolism of diltiazem.

INDICATIONS AND USAGE

1. Angina Pectoris Due to Coronary Artery Spasm. CARDIZEM

is indicated in the treatment of angina pectoris due to coronary artery spasm. CARDIZEM has been shown effective in the treatment of spontaneous coronary artery spasm presenting as Prinzmetal's variant angina (resting angina with ST-segment elevation occurring during attacks).

2. **Chronic Stable Angina (Classic Effort-Associated Anginal).** CARDIZEM is indicated in the management of chronic stable angina. CARDIZEM has been effective in controlled trials in reducing angina frequency and increasing exercise tolerance. There are no controlled studies of the effectiveness of the concomitant use of diltiazem and beta-blockers or of the safety of this combination in patients with impaired ventricular function or conduction abnormalities.

CONTRAINDICATIONS

CARDIZEM is contraindicated in (1) patients with sick sinus syndrome except in the presence of a functioning ventricular pacemaker, (2) patients with second- or third-degree AV block except in the presence of a functioning ventricular pacemaker, and (3) patients with hypotension (less than 90 mm Hg systolic).

WARNINGS

1. **Cardiac Conduction.** CARDIZEM prolongs AV node refractory periods without significantly prolonging sinus node recovery time, except in patients with sick sinus syndrome. This effect may rarely result in abnormally slow heart rates (particularly in patients with sick sinus syndrome) or second- or third-degree AV block (six of 1243 patients for 0.48%). Concomitant use of diltiazem with beta-blockers or digitalis may result in additive effects on cardiac conduction. A patient with Prinzmetal's angina developed periods of asystole (2 to 5 seconds) after a single dose of 60 mg of diltiazem.
2. **Congestive Heart Failure.** Although diltiazem has a negative inotropic effect in isolated animal tissue preparations, hemodynamic studies in humans with normal ventricular function have not shown a reduction in cardiac index nor consistent negative effects on contractility (dp/dt). Experience with the use of CARDIZEM alone or in combination with beta-blockers in patients with impaired ventricular function is very limited. Caution should be exercised when using the drug in such patients.
3. **Hypotension.** Decreases in blood pressure associated with CARDIZEM therapy may occasionally result in symptomatic hypotension.
4. **Acute Hepatic Injury.** In rare instances, patients receiving CARDIZEM have exhibited reversible acute hepatic injury as evidenced by moderate to extreme elevations of liver enzymes. (See PRECAUTIONS AND ADVERSE REACTIONS.)

PRECAUTIONS

General. CARDIZEM (diltiazem hydrochloride) is extensively metabolized by the liver and excreted by the kidneys and in bile. As with any new drug given over prolonged periods, laboratory parameters should be monitored at regular intervals. The drug should be used with caution in patients with impaired renal or hepatic function. In subacute and chronic dog and rat studies designed to produce toxicity, high doses of diltiazem were associated with hepatic damage. In special subacute hepatic studies, oral doses of 125 mg/kg and higher in rats were associated with histological changes in the liver which were reversible when the drug was discontinued. In dogs, doses of 20 mg/kg were also associated with hepatic changes; however, these changes were reversible with continued dosing.

Drug Interaction. Pharmacologic studies indicate that there may be additive effects in prolonging AV conduction when using beta-blockers or digitalis concomitantly with CARDIZEM. (See WARNINGS.)

Controlled and uncontrolled domestic studies suggest that concomitant use of CARDIZEM and beta-blockers or digitalis is usually well tolerated. Available data are not sufficient, however, to predict the effects of concomitant treatment, particularly in patients with left ventricular dysfunction or cardiac conduction abnormalities. In healthy volunteers, diltiazem has been shown to increase serum digoxin levels up to 20%.

Carcinogenesis, Mutagenesis, Impairment of Fertility. A 24-month study in rats and a 21-month study in mice showed no evidence of carcinogenicity. There was also no mutagenic response in *in vitro* bacterial tests. No intrinsic effect on fertility was observed in rats.

Pregnancy. Category C. Reproduction studies have been conducted in mice, rats, and rabbits. Administration of doses ranging from five to ten times greater (on a mg/kg basis) than the daily recommended therapeutic dose has resulted in embryo and fetal lethality. These doses, in some studies, have been reported to cause skeletal abnormalities. In the perinatal/postnatal studies, there was some reduction in early individual pup weights and survival rates. There was an increased incidence of stillbirths at doses of 20 times the human dose or greater.

There are no well-controlled studies in pregnant women; therefore, use CARDIZEM in pregnant women only if the potential benefit justifies the potential risk to the fetus.

Nursing Mothers. It is not known whether this drug is excreted in human milk. Because many drugs are excreted in human milk, exercise caution when CARDIZEM is administered to a nursing woman if the drug's benefits are thought to outweigh its potential risks in this situation.

Pediatric Use. Safety and effectiveness in children have not been established.

ADVERSE REACTIONS

Serious adverse reactions have been rare in studies carried out to date, but it should be recognized that patients with impaired ventricular function and cardiac conduction abnormalities have usually been excluded.

In domestic placebo-controlled trials, the incidence of adverse reactions reported during CARDIZEM therapy was not greater than that reported during placebo therapy.

The following represent occurrences observed in clinical studies which can be at least reasonably associated with the pharmacology of calcium influx inhibition. In many cases, the relationship to CARDIZEM has not been established. The most common occurrences, as well as their frequency of presentation, are: edema (2.4%)

headache (2.1%), nausea (1.9%), dizziness (1.5%), rash (1.3%), asthenia (1.2%), AV block (1.1%). In addition, the following event were reported infrequently (less than 1%) with the order of presentation corresponding to the relative frequency of occurrence.

Cardiovascular:	Flushing, arrhythmia, hypotension, bradycardia, palpitations, congestive heart failure, syncope.
Nervous System:	Paresthesia, nervousness, somnolence, tremor, insomnia, hallucinations, and amnesia.
Gastrointestinal:	Constipation, dyspepsia, diarrhea, vomiting, mild elevations of alkaline phosphatase, SGOT, SGPT, and LDH.
Dermatologic:	Pruritus, petechiae, urticaria, photosensitivity.
Other:	Polyuria, nocturia.

The following additional experiences have been noted:
A patient with Prinzmetal's angina experiencing episodes of vasospastic angina developed periods of transient asymptomatic asystole approximately five hours after receiving a single 60-mg dose of CARDIZEM.

The following postmarketing events have been reported infrequently in patients receiving CARDIZEM: erythema multiforme; leukopenia; and extreme elevations of alkaline phosphatase, SGOT, SGPT, LDH, and CPK. However, a definitive cause and effect between these events and CARDIZEM therapy is yet to be established.

OVERDOSAGE OR EXAGGERATED RESPONSE

Overdosage experience with oral diltiazem has been limited. Single oral doses of 300 mg of CARDIZEM have been well tolerated by healthy volunteers. In the event of overdosage or exaggerated response, appropriate supportive measures should be employed in addition to gastric lavage. The following measures may be considered:

Bradycardia	Administer atropine (0.60 to 1.0 mg). If there is no response to vagal blockade, administer isoproterenol cautiously.
High-Degree AV Block	Treat as for bradycardia above. Fixed high degree AV block should be treated with cardiac pacing.
Cardiac Failure	Administer inotropic agents (isoproterenol, dopamine, or dobutamine) and diuretics.
Hypotension	Vasopressors (eg, dopamine or levaterenol bitartrate).

Actual treatment and dosage should depend on the severity of the clinical situation and the judgment and experience of the treating physician.

The oral/LD₅₀'s in mice and rats range from 415 to 740 mg/kg and from 560 to 810 mg/kg, respectively. The intravenous LD₅₀'s in these species were 60 and 38 mg/kg, respectively. The oral LD₅₀'s in dogs is considered to be in excess of 50 mg/kg, while lethality was seen in monkeys at 360 mg/kg. The toxic dose in man is not known, but blood levels in excess of 800 ng/ml have not been associated with toxicity.

DOSE AND ADMINISTRATION

Exertional Angina Pectoris Due to Atherosclerotic Coronary Artery Disease or Angina Pectoris at Rest Due to Coronary Artery Spasm. Dosage must be adjusted to each patient's needs. Starting with 30 mg four times daily, before meals and at bedtime, dosage should be increased gradually (given in divide doses three or four times daily) at one- to two-day intervals until optimum response is obtained. Although individual patients may respond to any dosage level, the average optimum dosage range appears to be 180 to 240 mg/day. There are no available data concerning dosage requirements in patients with impaired renal or hepatic function. If the drug must be used in such patients, titration should be carried out with particular caution.

Concomitant Use With Other Antianginal Agents:

1. **Sublingual NTG** may be taken as required to abort acute anginal attacks during CARDIZEM therapy.
2. **Prophylactic Nitrate Therapy**—CARDIZEM may be safely administered with short- and long-acting nitrates, but there have been no controlled studies to evaluate the antianginal effectiveness of this combination.
3. **Beta-blockers.** (See WARNINGS and PRECAUTIONS.)

HOW SUPPLIED

Cardizem 30-mg tablets are supplied in bottles of 100 (NDC 0088-1771-47) and in Unit Dose Identification Paks of 100 (NDC 0088-1771-49). Each green tablet is engraved with MARION on one side and 1771 engraved on the other. CARDIZEM 60-mg score tablets are supplied in bottles of 100 (NDC 0088-1772-47) and in Unit Dose Identification Paks of 100 (NDC 0088-1772-49). Each yellow tablet is engraved with MARION on one side and 1772 on the other.

Issued 4/1/8

A defense against cancer can be cooked up in your kitchen.

Fruits, vegetables, and whole-grain cereals such as oatmeal, bran and wheat may help lower the risk of colorectal cancer.

Foods high in fats, salt- or nitrite-cured foods like ham, and

There is evidence that diet and cancer are related. Some foods may promote cancer, while others may protect you from it.

Foods related to lowering the risk of cancer of the larynx and esophagus all have high amounts of carotene, a form of Vitamin A which is in cantaloupes, peaches, broccoli, spinach, all dark green leafy vegetables, sweet potatoes, carrots, pumpkin, winter squash and tomatoes, citrus fruits and brussels sprouts.

fish and types of sausages smoked by traditional methods should be eaten in moderation.

Be moderate in consumption of alcohol also.

A good rule of thumb is cut down on fat and don't be fat.

Weight reduction may lower cancer risk. Our 12-year study of nearly a million Americans uncovered high cancer risks particularly among people 40% or more overweight.

Now, more than ever, we know you can cook up your own defense against cancer. So eat healthy and be healthy.

Foods that may help reduce the risk of gastrointestinal and respiratory tract cancer are cabbage, broccoli, brussels sprouts, kohlrabi, cauliflower.

No one faces cancer alone.

**On nitrates,
but angina still
strikes...**

After a nitrate, add ISOPTIN[®] (verapamil HCl/Knoll)

To protect your patients, as well as their quality of life,
add Isoptin instead of a beta blocker.

First, Isoptin not only reduces myocardial oxygen demand by reducing peripheral resistance, but also increases coronary perfusion by preventing coronary vasospasm and dilating coronary arteries — both normal and stenotic. These are antianginal actions that no beta blocker can provide.

Second, Isoptin spares patients the beta-blocker side effects that may compromise the quality of life.

With Isoptin, fatigue, bradycardia and mental depression are rare. Unlike beta blockers, Isoptin can safely be given to patients with asthma, COPD, diabetes or peripheral vascular disease. Serious adverse reactions with Isoptin are rare at recommended doses; the single most common side effect is constipation (6.3%).

Cardiovascular contraindications to the use of Isoptin are similar to those of beta blockers: severe left ventricular dysfunction, hypotension (systolic pressure <90 mm Hg) or cardiogenic shock, sick sinus syndrome (if no artificial pacemaker is present) and second- or third-degree AV block.

So, the next time a nitrate is not enough, add Isoptin... for more comprehensive antianginal protection without side effects which may cramp an active life style.

**ISOPTIN. Added
antianginal protection
without beta-blocker
side effects.**

ISOPTIN[®]

(verapamil HCl/Knoll)

80 mg and 120 mg scored, film-coated tablets

Contraindications: Severe left ventricular dysfunction (see *Warnings*), hypotension (systolic pressure < 90 mm Hg) or cardiogenic shock, sick sinus syndrome (except in patients with a functioning artificial ventricular pacemaker), 2nd- or 3rd-degree AV block. **Warnings:** ISOPTIN should be avoided in patients with severe left ventricular dysfunction (e.g., ejection fraction < 30% or moderate to severe symptoms of cardiac failure) and in patients with any degree of ventricular dysfunction if they are receiving a beta blocker. (See *Precautions*.) Patients with milder ventricular dysfunction should, if possible, be controlled with optimum doses of digitalis and/or diuretics before ISOPTIN is used. (Note interactions with digoxin under *Precautions*.) ISOPTIN may occasionally produce hypotension (usually asymptomatic, orthostatic, mild and controlled by decrease in ISOPTIN dose). Elevations of transaminases with and without concomitant elevations in alkaline phosphatase and bilirubin have been reported. Such elevations may disappear even with continued treatment; however, four cases of hepatocellular injury by verapamil have been proven by rechallenge. Periodic monitoring of liver function is prudent during verapamil therapy. Patients with atrial flutter or fibrillation and an accessory AV pathway (e.g. W-P-W or L-G-L syndromes) may develop increased antegrade conduction across the aberrant pathway bypassing the AV node, producing a very rapid ventricular response after receiving ISOPTIN (or digitalis). Treatment is usually D.C.-cardioversion, which has been used safely and effectively after ISOPTIN. Because of verapamil's effect on AV conduction and the SA node, 1° AV block and transient bradycardia may occur. High grade block, however, has been infrequently observed. Marked 1° or progressive 2° or 3° AV block requires a dosage reduction or, rarely, discontinuation and institution of appropriate therapy depending upon the clinical situation. Patients with hypertrophic cardiomyopathy (IHSS) received verapamil in doses up to 720 mg/day. It must be appreciated that this group of patients had a serious disease with a high mortality rate and that most were refractory or intolerant to propranolol. A variety of serious adverse effects were seen in this group of patients including sinus bradycardia, 2° AV block, sinus arrest, pulmonary edema and/or severe hypotension. Most adverse effects responded well to dose reduction and only rarely was verapamil discontinued. **Precautions:** ISOPTIN should be given cautiously to patients with impaired hepatic function (in severe dysfunction use about 30% of the normal dose) or impaired renal function, and patients should be monitored for abnormal prolongation of the PR interval or other signs of excessive pharmacologic effects. Studies in a small number of patients suggest that concomitant use of ISOPTIN and beta blockers may be beneficial in patients with chronic stable angina. Combined therapy can also have adverse effects on cardiac function. Therefore, until further studies are completed, ISOPTIN should be used alone, if possible. If combined therapy is used, close surveillance of vital signs and clinical status should be carried out. Combined therapy with ISOPTIN and propranolol should usually be avoided in patients with AV conduction abnormalities and/or depressed left ventricular function. Chronic ISOPTIN treatment increases serum digoxin levels by 50% to 70% during the first week of therapy, which can result in digitalis toxicity. The digoxin dose should be reduced when ISOPTIN is given, and the patients should be carefully monitored to avoid over- or under-digitalization. ISOPTIN may have an additive effect on lowering blood pressure in patients receiving oral antihypertensive agents. Disopyramide should not be given within 48 hours before or 24 hours after ISOPTIN administration. Until further data are obtained, combined ISOPTIN and quinidine therapy in patients with hypertrophic cardiomyopathy should probably be avoided, since significant hypotension may result. Clinical experience with the concomitant use of ISOPTIN and short- and long-acting nitrates suggest beneficial interaction without undesirable drug interactions. Adequate animal carcinogenicity studies have not been performed. One study in rats did not suggest a tumorigenic potential, and verapamil was not mutagenic in the Ames test. **Pregnancy Category C:** There are no adequate and well-controlled studies in pregnant women. This drug should be used during pregnancy, labor and delivery only if clearly needed. It is not known whether verapamil is excreted in breast milk; therefore, nursing should be discontinued during ISOPTIN use. **Adverse Reactions:** Hypotension (2.9%), peripheral edema (1.7%), AV block: 3rd degree (0.8%), bradycardia: HR < 50/min (1.1%), CHF or pulmonary edema (0.9%), dizziness (3.6%), headache (1.8%), fatigue (1.1%), constipation (6.3%), nausea (1.6%), elevations of liver enzymes have been reported. (See *Warnings*.) The following reactions, reported in less than 0.5%, occurred under circumstances where a causal relationship is not certain: ecchymosis, bruising, gynecomastia, psychotic symptoms, confusion, paresthesia, insomnia, somnolence, equilibrium disorder, blurred vision, syncope, muscle cramp, shakiness, claudication, hair loss, macules, spotty menstruation. **How Supplied:** ISOPTIN (verapamil HCl) is supplied in round, scored, film-coated tablets containing either 80 mg or 120 mg of verapamil hydrochloride and embossed with "ISOPTIN 80" or "ISOPTIN 120" on one side and with "KNOLL" on the reverse side. Revised August, 1984. 2385

EMPLOYEES APPRECIATE THE PAYROLL SAVINGS PLAN.

JUST ASK THE PEOPLE AT E-SYSTEMS.

"Bonds are a good liquid investment, and if I don't use them, they continue to earn interest."

—L.A. Fulcher

"I put myself and my children through school with Savings Bonds. They're great!"

—Ken Sclater, Jr.

"I save them, but when I want something extra, I know they're there. They're great for emergencies."

—Jose Acosta

U.S. Savings Bonds now offer higher, variable interest rates and a guaranteed return. Your employees will appreciate that. They'll also appreciate your giving them the easiest, surest way to save.

For more information, write to: Steven R. Mead, Executive Director, U.S. Savings Bonds Division, Department of the Treasury, Washington, DC 20226.

HOLLY HILL HOSPITAL

Holly Hill Hospital is a 108-bed private psychiatric hospital located in Raleigh. It offers evaluation and treatment that includes:

- Specialized treatment units for ADULTS, ADOLESCENTS and OLDER ADULTS.
- A team approach drawing from the disciplines of medicine, psychology, nursing and social work.
- Group therapy, activities therapy, psychological testing and biofeedback.
- An admitting staff of 33 psychiatrists.
- 24-hour admissions. (Physicians referral service available)

For more information concerning referrals and admissions, call:
 Director of Community Relations
 (919) 755-1840

3019 Falstaff Road

EXCERPTS FROM A SYMPOSIUM
"THE TREATMENT OF SLEEP DISORDERS"⁸

“... highly effective
for both sleep induction and
sleep maintenance”

Sleep Laboratory Investigator
Pennsylvania

“... onset of action is
rapid... provides sleep with
no rebound effect to agitate the
patient the following day”

Psychiatrist
California

“... appears to have
the best safety record of any
of the benzodiazepines”

Psychiatrist
California

After 15 years, the experts still concur about the continuing value of Dalmane (flurazepam HCl/Roche). It provides sleep that satisfies patients... and the wide margin of safety that satisfies you.

The recommended dose in elderly or debilitated patients is 15 mg. Contraindicated in pregnancy.

DALMANE[®]
flurazepam HCl/Roche [®]
sleep that satisfies

DALMANE[®]
flurazepam HCl/Roche [®]

Before prescribing, please consult complete product information, a summary of which follows:
Indications: Effective in all types of insomnia characterized by difficulty in falling asleep, frequent nocturnal awakenings and/or early morning awakening, in patients with recurring insomnia or poor sleeping habits, in acute or chronic medical situations requiring restful sleep. Objective sleep laboratory data have shown effectiveness for at least 28 consecutive nights of administration. Since insomnia is often transient and intermittent, prolonged administration is generally not necessary or recommended. Repeated therapy should only be undertaken with appropriate patient evaluation.

Contraindications: Known hypersensitivity to flurazepam HCl, pregnancy. Benzodiazepines may cause fetal damage when administered during pregnancy. Several studies suggest an increased risk of congenital malformations associated with benzodiazepine use during the first trimester. Warn patients of the potential risks to the fetus should the possibility of becoming pregnant exist while receiving flurazepam. Instruct patient to discontinue drug prior to becoming pregnant. Consider the possibility of pregnancy prior to instituting therapy.

Warnings: Caution patients about possible combined effects with alcohol and other CNS depressants. An additive effect may occur if alcohol is consumed the day following use for nighttime sedation. This potential may exist for several days following discontinuation. Caution against hazardous occupations requiring complete mental alertness (e.g., operating machinery, driving). Potential impairment of performance of such activities may occur the day following ingestion. Not recommended for use in persons under 15 years of age. Though physical and psychological dependence have not been reported on recommended doses, abrupt discontinuation should be avoided with gradual tapering of dosage for those patients on medication for a prolonged period of time. Use caution in administering to addiction-prone individuals or those who might increase dosage.

Precautions: In elderly and debilitated patients, it is recommended that the dosage be limited to 15 mg to reduce risk of oversedation, dizziness, confusion and/or ataxia. Consider potential additive effects with other hypnotics or CNS depressants. Employ usual precautions in severely depressed patients, or in those with latent depression or suicidal tendencies, or in those with impaired renal or hepatic function.

Adverse Reactions: Dizziness, drowsiness, lightheadedness, staggering, ataxia and falling have occurred, particularly in elderly or debilitated patients. Severe sedation, lethargy, disorientation and coma, probably indicative of drug intolerance or overdosage, have been reported. Also reported: headache, heartburn, upset stomach, nausea, vomiting, diarrhea, constipation, GI pain, nervousness, talkativeness, apprehension, irritability, weakness, palpitations, chest pains, body and joint pains and GU complaints. There have also been rare occurrences of leukopenia, granulocytopenia, sweating, flushes, difficulty in focusing, blurred vision, burning eyes, faintness, hypotension, shortness of breath, pruritus, skin rash, dry mouth, bitter taste, excessive salivation, anorexia, euphoria, depression, slurred speech, confusion, restlessness, hallucinations, and elevated SGOT, SGPT, total and direct bilirubins, and alkaline phosphatase, and paradoxical reactions, e.g., excitement, stimulation and hyperactivity.

Dosage: Individualize for maximum beneficial effect. Adults: 30 mg usual dosage, 15 mg may suffice in some patients. Elderly or debilitated patients: 15 mg recommended initially until response is determined.

Supplied: Capsules containing 15 mg or 30 mg flurazepam HCl.

Roche Products Inc
Mandí, Puerto Rico 00701

#1 FOR SLEEP

After more than 15 years of use, it's #1 for sleep that satisfies. Patients are satisfied because they fall asleep fast and stay asleep till morning.¹⁻³ And *you're* satisfied by the exceptionally wide margin of safety.⁷⁻⁹ As always, caution patients about driving or drinking alcohol.
